MOTICAM HDMI STANDALONE CAMERAS

WITH ON-BOARD SOFTWARE

MOTICAM 1080X

FULL HD STANDALONE CAMERA

MOTICAM 4000

TRUE 4K IMAGING

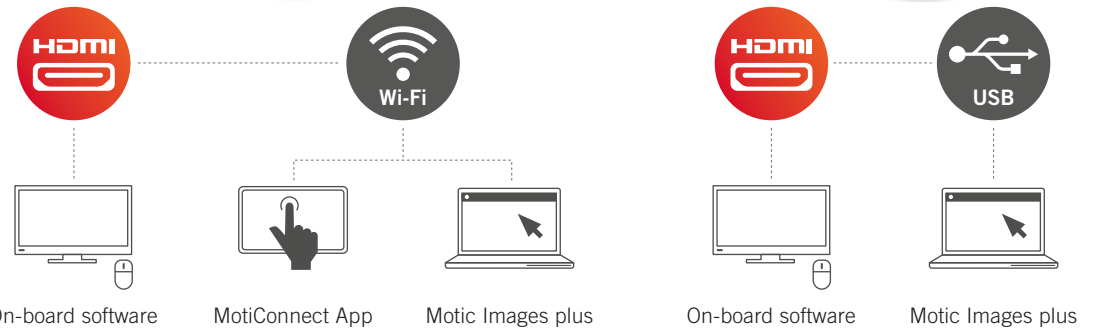

The new Moticam 1080X and Moticam 4000, are both part of our HDMI standalone camera range. Display your live images on a screen by connecting the camera via HDMI port. Make live measurements, image adjustments and more, thanks to its on-board software that can be controlled through the screen by connecting a USB mouse to the camera.

Thanks to its Wi-Fi connectivity, you can also connect the Moticam 1080X with a computer or mobile device, even simultaneously, and share your live images with ease.

The Moticam 4000 can be connected through USB to a computer and visualize your samples at the same time in both devices.
